(1) System-wide comparable restaurant sales, restaurant contribution, pro forma net income and adjusted EBITDA are not presented in accordance with accounting principles generally accepted in the United States of America ("GAAP") and are defined below under "Key Financial Definitions." A reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measure is included in the accompanying financial data. See also "Non-GAAP Financial Measures."

Bernard Acoca, President and Chief Executive Officer of El Pollo Loco Holdings, Inc., stated, "Our strong second quarter performance was characterized by the continued sales recovery in both our LA and outer markets, resulting in over 22% top line improvement and strong two-year system-wide comparable restaurant sales growth of 14.8% compared to the second quarter of 2019. We were able to leverage our sales improvement and labor efficiencies to post a 20.8% restaurant contribution margin during the quarter. Our two-year system-wide comparable sales growth continued in the month of July coming in at 14.6% and company weekly average unit volumes have been over \$40,000 for 18 straight weeks, demonstrating the strength we are seeing in our business. As we look at the back half of the year, we will work to sustain this sales momentum and work to manage the impact of increasing labor and commodity costs. We will also continue to execute on our acceleration agenda to further scale our brand for rapid and successful growth, especially in new geographies."

Second Quarter 2021 Financial Results

During the second quarter, the Company paid down \$13.8 million of debt, and as of June 30, 2021 had \$40.0 million of debt outstanding and \$12.6 million in cash and cash equivalents.

Company-operated restaurant revenue in the second quarter of 2021 increased to \$107.0 million, compared to \$87.7 million in the second quarter of 2020, primarily due to a 16.4% increase in company-operated comparable restaurant sales. The company-operated comparable restaurant sales increase consisted of an approximately 0.4% increase in average check size and a 15.9% increase in transactions. In addition, company-operated revenue was favorably impacted by \$1.3 million of additional sales from restaurants opened during or after the second quarter of the prior year and a \$1.1 million increase in revenue from restaurants that were temporarily closed due to the COVID-19 pandemic during the second quarter of the prior year.

Franchise revenue in the second quarter of 2021 increased 24.9% to \$8.4 million, compared to \$6.7 million in the second quarter of 2020. This increase was primarily due to a 24.5% increase in franchise comparable restaurant sales and the opening of two new franchise restaurants during or subsequent to the second quarter of 2020. The increase in franchise revenue was partially offset by the closure of three franchise locations during the same period.

Income from operations in the second quarter of 2021 was \$12.7 million, compared to \$7.4 million in the second quarter of 2020. Restaurant contribution was \$22.2 million, or 20.8% of company-operated restaurant revenue, compared to \$17.2 million, or 19.6% of company-operated restaurant revenue in the second quarter of 2020. The increase in restaurant contribution was largely due to higher company-operated restaurant

revenue partially offset by the impact of wage increases and higher operating costs. Restaurant contribution is a non-GAAP measure defined below under "Key Financial Definitions."

General and administrative expenses in the second quarter of 2021 were \$10.5 million, consistent with the comparable period in the prior year. The increase of \$0.1 million for the quarter was due primarily to a \$1.3 million increase in labor related costs, primarily related to an increase in management bonus expense, a \$0.3 million increase in stock compensation expenses and a \$0.4 million increase in temporary office staff and recruiting fees, partially offset by a \$2.1 million decrease in legal and professional expenses.

Net income for the second quarter of 2021 was \$8.8 million, or \$0.24 per diluted share, compared to net income of \$5.5 million, or \$0.16 per diluted share, in the second quarter of 2020. Pro forma net income was \$10.7 million, or \$0.29 per diluted share, during the second quarter of 2021, compared to \$6.9 million, or \$0.20 per diluted share, during the second quarter of 2020.

Subsequent Events

Subsequent to the second quarter of 2021, the Company completed the sale of eight restaurants in the Sacramento market to an existing franchisee. This sale resulted in a loss on assets held for sale of \$1.5 million for the second quarter of 2021.

2021 Outlook

Due to the uncertainty surrounding the COVID-19 pandemic, the company is not yet providing a financial outlook for the year ending December 29, 2021. However, the company is reiterating the following expectations for 2021:

- Increased commodity and labor costs during the second half of the year due to continuing supply chain and restaurant staffing challenges.
- The opening of three to five new company-owned restaurants and four to six new franchised restaurants.
- Pro forma income tax rate of 26.5%.

Key Financial Definitions

System-wide sales are neither required by, nor presented in accordance with, GAAP. System-wide sales are the sum of company-operated restaurant revenue and sales from franchised restaurants. The Company's total revenue in the consolidated statements of operations is limited to company-operated restaurant revenue and franchise revenue from the Company's franchisees. Accordingly, system-wide sales should not be considered in isolation or as a substitute for our results as reported under GAAP. Management believes that system-wide sales are an important figure for investors because they are widely used in the restaurant industry, including by our management, to evaluate brand scale and market penetration.

Comparable restaurant sales reflect the change in year-over-year sales for the comparable company, franchised and total system restaurant base. The comparable restaurant base is defined to include those restaurants open for 15 months or longer and excludes restaurants that were closed during the applicable period. At June 30, 2021, there were 191 restaurants in our comparable company-operated restaurant base and 465 restaurants in our comparable system restaurant base.

Restaurant contribution and **restaurant contribution margin** are neither required by, nor presented in accordance with, GAAP. Restaurant contribution is defined as company-operated restaurant revenue less company restaurant expenses, which are food and paper costs, labor and related expenses, and occupancy and other operating expenses. Restaurant contribution excludes certain costs, such as general and administrative expenses, depreciation and amortization, asset impairment and closed-store reserves, loss on sale of restaurants, recovery of securities lawsuits related legal expenses and other costs that are considered normal operating costs. Accordingly, restaurant contribution is not indicative of overall Company results and does not accrue directly to the benefit of shareholders because of the exclusion of certain corporate-level expenses. Restaurant contribution margin is defined as restaurant contribution as a percentage of net company-operated restaurant revenue. See also "Non-GAAP Financial Measures."

EBITDA and **adjusted EBITDA** are neither required by, nor presented in accordance with, GAAP. EBITDA represents net income before interest expense, provision for income taxes, depreciation, and amortization, and adjusted EBITDA represents EBITDA before items that we do not consider representative of our underlying operating performance, as identified in the GAAP reconciliation in the accompanying financial data. See also "Non-GAAP Financial Measures."

Pro forma net income is neither required by, nor presented in accordance with, GAAP. Pro forma net income represents net income adjusted for (i) costs (or gains) related to loss (or gains) on disposal of assets or assets held for sale and asset impairment and closed store costs reserves, (ii) amortization expense and other estimate adjustments (whether expense or income) incurred on the Tax Receivable Agreement ("TRA") completed at the time of our IPO, (iii) legal costs associated with securities class action litigation, (iv) extraordinary legal settlement costs, (v) insurance proceeds received related to securities class action legal expenses and (vi) provision for income taxes at a normalized tax rate of 26.5% for the thirteen and twenty-six weeks ended June 30, 2021 and thirteen and twenty-six weeks ended June 24, 2020, which reflects our estimated long-term effective tax rate, including both federal and state income taxes (excluding the impact of the income tax receivable agreement and valuation allowance) and applied after giving effect to the foregoing adjustments. See the GAAP reconciliation in the accompanying financial data and "Non-GAAP Financial Measures."
